

Dear Commissioners,

I oppose the propose changes that would require broadcasters to record what is done or said on the radio. I am heart sick to know that the time our small staff here would be taking to worry about recording, documenting and logging what's aired on our station would take away from the other important things we do like helping our community find lost dogs and cats, raise money for food, help with mentally handicapped, help with mentoring programs, raise funds for school supplies for need children.. I can go on and on.. but please don't regulate us any more than we are. Fees keep going up, and we are proud to be a good public servant. Small market stations are forced to buy enough high priced equipment to comply with so many new technical issues and rules and FCC fees continue to go up. Please reconsider this and not make radio the scape goat for the Howard Sterns and Janet Jackson's.. please! Most broadcasters are doing a great job of being a good community partner.

Thank you for reading this.

Paul F. Tinkle, President
